Previous Year Question Papers

Subject: PGD-PPT / PGD-PTQC

1. Galvanic cells are used to convert ___________________.
   a) K.E. to potential energy b) K.E. to electrical energy
   c) chemical energy to electrical energy d) None of these

2. pH of Blood is ________________.
   a) 1.6 b) 7.4 c) 0 d) 14

3. If the pressure increases the melting point of ice __________________.
   a) increases b) decreases
   c) unchanged d) either increases or decreases

4. If half life period of a first order reaction is 20 minutes then the time taken for 1 kg of the substances reduced into 250 gm is ____________________.
   a) 40 minutes b) 20 minutes c) 30 minutes d) 60 minutes

5. The quantity of heat required to change one mole of solid completely into liquid at its melting point is called _________________.
   a) enthalpy of sublimation b) enthalpy of fusion
   c) enthalpy of combustion d) enthalpy of solution

6. Which change takes place spontaneously ?
   a) reversible change b) irreversible change
   c) both a & b d) None of these

7. Any solution may contain less solute is called as ________________.
   a) saturated solution b) unsaturated solution
   c) supersaturated solution d) none of these

8. The colour of sky is due to __________________.
   a) rotation of earth b) absorption of light
   c) wavelength of scattered light d) reflection of light

9. Sugar dissolved in a water. This is example for __________________.
   a) solutions b) suspension c) colloids d) none of these

10. Laser is used in ____________________.
    a) boring diamonds b) cutting of metals
    c) treatment of cancer d) all of these

11. Covalent bond is ____________________.
    a) transference of electrons
    b) sharing of electrons
    c) loses of elections
    d) all of these

12. Reduction is ___________________.
    a) addition of hydrogen
    b) gain of electron
    c) removal of negative radical
    d) all of these

13. The average distance travelled by a molecule between two successive collision is called _______________.
    a) average free path
    b) partial free path
    c) mean free path
    d) none of these

14. Glass, rubber and plastics are
    a) long-range order
    b) amorphous solids
    c) in geometric form
    d) none of these

15. Magnetic permeability measures ____________________.
    a) electrical force
    b) the tendency of the magnetic lines of force to pass through the medium
    c) magnetic strength
    d) all of the above

16. Neutron is _______________________.
    a) positively charged
    b) negatively charged
    c) neutrally charged
    d) none of these

17. According to Bohr's Atom model
    a) the electron in an atom revolve around the atom
    b) the electron in an atom revolve around the nucleus
    c) the neutron in an atom revolve around the electron
    d) all of the above

18. Electromagnetic radiation with maximum wavelength is ________________________.
    a) ultraviolet
    b) radiowaves
    c) X-rays
    d) infrared

19. Conduction of current in electrolyte is due to ________________________.
    a) electrons
    b) ions
    c) protons
    d) all of these

20. Which one of the following used as a coolant in aircraft ?
    a) Glycerol
    b) Benzyl Alcohol
    c) Ethyl Alcohol
    d) Ethylene Glycol

21. Ethers are ____________________________.
a) chemically active b) chemically inert
c) sometime active and inactive d) all of these

22. Amines are _____________________.
a) acidic b) basic c) less acidic d) neutral

23. First organic compound synthesised in the laboratory was ________________.
a) methane b) urea c) alcohol d) all of these

24. Oils contain _____________________.
a) unsaturated olefinic bonds b) saturated olefinic bonds
c) saturated single bonds d) none of these

25. Candles are made from ______________________.
a) lanolin wax b) bees wax c) paraffin wax d) all of these

26. Lysine is ______________________________.
a) neutral amino acids b) acidic amino acids
c) basic amino acids d) all of these

27. Proteins contain __________________________.
a) nitrogen b) carbon c) oxygen d) all of these

28. Glucose is ______________________________.
a) optically inactive b) optically active c) racemic mixture d) none of these

29. Test for glucose is ________________________.
a) tollen's Reagent b) schiff's Test c) decessler Test d) dilution Test

30. Which carbohydrate is used in silvering of mirror ?
a) sucrose b) starch c) fructose d) glucose

31. Milk contains ___________________________.
a) glucose b) fructose c) starch d) lactose

32. Which of the following is optically active ?
a) amyl alcohol b) glyceraldehyde c) lactic acid d) all of these

33. Pyrolysis is _______________________________________.
a) the decomposition of a compound by nitrogen
b) the decomposition of a compound by heat
c) the decomposition of a compound by halogen
d) none of the above.

34. Kerosene is a mixture of ________________________________.
a) alkenes b) alkanes c) alkynes d) arenes

35. Carbonyl compounds are ______________________________.
a) aldehydes b) alcohols
c) aldehydes and ketones d) esters

36. Vinegar is a ____.
a) 5% solution of acetic acid b) 20% solution of acetic acid
c) 40% solution of acetic acid d) none of these

37. Fruits like grapes and tamarind contains ________________________________.
a) Lactic acid b) Succinic acid c) Tartaric acid d) Adipic acid

38. Which one of the molecule is strong ?
a) non Polar molecule b) polar molecule
c) both a & b d) all of these

39. Freon is used in __________________________________.
a) Solvent b) Medicine c) Refrigerators d) T.V.

40. Chloroform is always stored in dark coloured bottles due to ___________________.
a) oxidation of chloroform to give poisonous gas
b) easily reduced to liberate chlorine
c) it is easily explosive in the presence of white bottles
d) all the above.

41. Tear gas is ________________________________.
a) chloropicrin b) methyl chloride c) chloretone d) all of these

42. Chloroform is used as ________________________.
a) solvent b) anaesthetic c) insecticide d) all of these

43. Which one of the metals does not form amalgam ?
a) Cu b) Fe c) Ag d) Zn

44. These are atoms of the same element which have the same atomic number and different mass number
a) Isotopes b) Isobars c) Isochore d) all of these

45. Which one of the gas is used in fire extinguishers ?
a) CO b) CO2 c) SO2 d) all of these

46. Which one of the following gases is a noble gas ?
a) Chlorine b) Nitrogen c) Hydrogen d) Radon

47. Hydrogen exists in ______________________.
a) mono atomic b) diatomic c) triatomic d) tetra atomic

48. Which one of the radiation is used in NMR ?
a) Light radiation b) Magnetic radiation
c) Electromagnetic radiation d) All of these

49. Which one of the statement is correct regarding Raman spectroscopy ?
a) Molecules prefer to stay in the higher vibrational excited state
b) Molecules prefer to stay in the lower vibrational ground state
c) Molecules prefer to stay in the middle state
d) All the above

50. Purest form of Iron is ______________________.
a) Cast iron b) Hard steel c) Wrought iron d) Stainless steel

51. The branch of the Physics which deals with current conduction through semi-conductor is known as
a) Electronics b) Nuclear Physics c) Atomic Physics d) Acoustics

52. Transistors are made from
a) Metalloids b) Insulator c) Semi conductors d) None of these

53. Radar works on the principle of __________________.
a) radio echoes b) video echoes
c) electromagnetic echoes d) none of these

54. Positron is a particle which is
a) Similar to an electron
b) Similar to an electron but with positive charge
c) Similar to proton
d) Similar to proton but with negative charge

55. Geiger counter is used to measure
a) heart beat b) surface tension c) radiation d) blood pressure

56. In radiation hazards the damage can be
a) pathological b) genetic c) easily rectified d) either (a) or (b)

57. Raman effect supports __________________ theory.
a) Wave theory b) Corpuscular theory

c) EM theory
d) Quantum theory

58. The spectrum of sodium is
a) band spectrum
b) a continuous emission spectrum
c) a line spectrum
d) an infrared spectrum

59. The instrument which used to detect IR radiations is
a) Bolometer
b) Golay cell
c) Photo conductivity cell
d) All of these

60. Holography is the process of producing
a) images by laser
b) three dimensional images by laser
c) photography using laser
d) signals by laser

61. The colour of light depends on
a) velocity
b) wavelength
c) amplitude
d) intensity

62. Holography can be used
a) optical signal processing
b) carry out minute microsurgical operation within cells
c) character recognition and for identification of figer points etc
d) both a & c

63. Cathode rays consists of
a) electrons
b) protons
c) ions
d) α particles

64. The gas law PV = constant is true for
a) Real gases
b) Isothermal and adiabatic changes
c) Isothermal change only
d) Adiabatic change only

65. X-rays can be used
a) for cutting and welding purposes
b) to cure blood cancer
c) to detect gold under the earth
d) to detect flaws in witting and welding

66. Coolidge tube is associated with
a) X-rays
b) gamma rays
c) Newtons rings
d) diffraction

67. Photoelectric cells are used to convert
a) light energy into sound energy
b) electrical energy into light energy
c) light energy into electrical energy
d) light energy into heat energy

68. In Bohr's atom model the electrostatic force of attraction between the nucleus and electron is balanced by __________________ force.
a) centripetal
b) magnetic
c) electrostatic
d) nuclear

69. Basically all materials exhibit
a) electromagnetic property b) paramagnetic property
c) ferromagnetic property d) diamagnetic property

70. Which of the following material is used for making permanent magnet ?
a) copper b) brass c) steel d) soft iron

71. In the SI system, the unit of energy is
a) Joule b) Electron volt c) Calorie d) Erg

72. Which of the following substance is an insulator ?
a) Silver b) Copper c) Glass d) Aluminium

73. Capacitor is a device to store ________________________.
a) current b) resistance c) potential d) charge

74. Two waves are said to be coherent, if they have
a) same wavelength b) same amplitude
c) same initial phase d) all of these

75. The fringe obtained in Newton's rings experiment are ________________________.
a) elliptical b) concentric circles
c) circles with different centres d) cylindrical

76. An object entering earth's atmosphere at a high velocity catches fire due to
a) viscosity of air b) the high heat content of atmosphere
c) high force of g d) pressure of certain gases

77. __________________ has highese elasticity
a) rubber b) steel c) brass d) copper

78. _______________ solids do not have definite melting point.
a) Amorphous solids b) Polycrystals c) Crystals d) Quartz

79. Ultrasonic waves have
a) frequency higher than 20,000 Hz b) velocity more than 330 ms-1
c) frequency less than 20 Hz d) velocity equal to that of supersonic plane

80. Waves formed on the surface of water is
a) transverse b) longitudinal c) electromagnetic d) stationary

81. The population of a town increases at a certain rate per annum. At present it is 3000, in 3 years time it became 3300. What will be it in six years time ?
a) 3,700 b) 3,630 c) 3,600 d) none of these

82. The traffic light at three different road crossings changes after every 48 sec, 72 sec and 108 sec respectively. If they all change simultaneously at 8 : 20 : 00 hours, then they will again change simultaneously at
a) 8 : 27 : 12 hours b) 8 : 27 : 24 hours
c) 8 : 37 : 36 hours d) 8 : 27 : 48 hours

83. A sells a bicycle to B at a profit of 20% and B sell it to C at a profit of 25%. If C pays Rs. 1,500 what did A pay for it?
a) Rs. 825 b) Rs. 900 c) Rs. 1,000 d) Rs. 1,125

84. A sum of money is divided among three persons in the ratio of 4 : 6 : 9. If the largest share is Rs. 1,000 more than the smallest share, what is the total sum ?
a) Rs. 4,000 b) Rs. 9,500 c) Rs. 3,600 d) Rs. 3,800

85. A vessel contains 56 litre of mixture of milk and the water in the ratio 5 : 2. How much water should be mixed with it so that the ratio of milk to water be 4 : 5 ?
a) 30 litre b) 35 litre c) 25 litre d) 34 litre

86. A certain number of persons could do a piece of work in 50 days. If there were 8 persons less, it would have been completed in 10 days more. The number of persons in the beginning was
a) 56 b) 48 c) 40 d) 32

87. If a man walks at the rate of 5 km/hr, he misses a train by only 7 minutes. However, if he walks at the rate of 6 km/hr, he reaches the station 5 minutes before the arrival of the train. The distance (in km) covered by him to reach the station is
a) 5 b) 6 c) 7 d) 8

88. A 180 metre long train crosses a signal post in 6 seconds. What is the speed of the train?
a) 100 kmph b) 120 kmph c) 140 kmph d) none of these

89. Ashok bought a TV with 20% discount on the labeled price. He made a profit of Rs. 800 by selling it at Rs. 16,800. What was the labeled price ?
a) Rs. 18,000 b) Rs. 20,800 c) Rs. 24,000
d) Rs. 20,000

90. If 40 men can build a wall 300 m long in 12 days working 6 hours a day, how long will it take 30 men to build a similar wall 200 m long working 8 hours a day ?
a) 4 ½ days b) 8 days c) 10 ½ days d) 11 days

91. Lunar eclipse occurs when
a) Earth is between the Sun and the Moon
b) Moon is between the Sun and the Earth
c) Sun is between the Earth and the Moon
d) None of the above

92. 2008 Olympic Games were held at
a) Tokyo b) Beijing c) Greece d) Toronto

93. Which of the following is referred to as the Fourth Estate ?
a) Press b) Doordarshan c) Judiciary d) Parliament

94. The oldest Indian University is
a) Calcutta University b) Bombay University
c) Madras University d) Benaras Hindu University

95. The first State in India to have 'palace on wheels' is
a) Karnataka b) Haryana c) Rajasthan d) Maharashtra

96. The climate of India is
a) Tropical Climate b) Subtropical Climate
c) Savanna Type of Climate d) Latitude Climate

97. The normal temperature of human body is
a) 98.4ºF b) 36.9ºC c) -37ºC d) 98.4ºK

98. Cash crop does not include
a) Sugarcane b) Cotton c) Jute d) Wheat

99. Which country is called the 'Land of the Midnight Sun' ?
a) Finland b) Ireland c) Norway d) Sweden

100. Which of the following is the largest river of the world ?
a) Nile b) Mississippi-Missouri
c) Amazon d) Yangtze

101. What is the correct formula of phosphorus trioxide ?
a) P_2O_3 b) P_4O_6 c) PO_3 d) PO_6

102. Who introduced the term pH ?
a) Faraday b) Arthenius c) Sorensen d) Debye

103. Lipids are
a) fatty acids b) hormones c) enzymes d) none of these

104. Which of the following is the most electronegative element ?
a) Nitrogen b) Fluorine c) Chlorine d) Oxygen

105. The valency of carbon in oxalic acid ($H_2C_2O_4$) is
a) 1 b) 2 c) 3 d) 4

106. Which chemical is used in artificial fibre ?
a) Rayon b) Terelene c) Teflon d) None of these

107. Which one of the following does not have a tetrahedral structure ?
a) Graphite b) Diamond c) Ammonia d) Methane

108. Hydrogen peroxide does not act as
a) reducing agent b) oxidizing agent
c) dehydrating agent d) bleaching agent

109. In a chemically pure state, diamonds are
a) monochromatic b) polychromatic
c) colourless d) none of these

110. An isomer of ethyl alcohol is
a) Dimethyl ether b) Methyl alcohol c) Diethyl ether d) Acetone

111. Ethane is
a) Paraffin b) Unsaturated hydrocarbon
c) Alcohol d) Carbohydrate

112. Which one of the following elements is not detected by Lassaignes test ?
a) Sulphur b) Nitrogen c) Oxygen d) Chlorine

113. Ethanol is manufactured by
a) Reducing acetaldehyde b) The fermentation of sugar by yeast
c) The hydrolysis of ethyl halide d) Grinard’s reagent

114. Two or more compounds which have the same number & the same kind of atoms are called
a) Isomers b) Allotropes c) Polymers d) Electrolytes

115. The total number of sigma bonds in (C_2H_6) is
a) Four b) Five c) Six d) Seven

116. The compound having the molecular formula $C_2H_4O_2$ is a
a) Ketone b) Aldehyde c) Acid d) Ether

117. The number of electrons in the outermost orbit of the chlorine is

a) 1 b) 7 c) 2 d) Not fixed

118. If a solid is dispersed in a liquid the colloid is known as
a) Gel b) Solution c) Emulsion d) None of these

119. The shape of methane molecule is
a) Pentahedral b) Hexahedral c) Octahedral d) Tetrahedral

120. When an element with very low ionization potential is reacted with an element of very high electron affinity
a) No bond is formed
b) A coordinate bond is formed
c) A covalent bond is formed
d) An ionic bond is formed

121. Which one of the following substances can be used both as a fuel and a reducing agent ?
a) Coke b) Wood c) Methane d) Methyl alcohol

122. Which of the following is amorphous ?
a) Glass
b) Sodium chloride
c) Powdered marble
d) Cane sugar

123. Carbohydrates are the compounds of
a) Carbon and hydrogen
b) Carbon, oxygen and hydrogen
c) Carbon, oxygen, hydrogen and nitrogen
d) Carbon, nitrogen and hydrogen

124. Which of the following gas burns in air ?
a) Nitrogen
b) Carbon dioxide
c) Carbon monoxide
d) Ammonia

125. Temporary hardness of water is due to the presence of
a) Magnesium sulphate
b) Sodium chloride
c) Calcium sulphate
d) Calcium hydrogen carbonate

126. Verma gets 10% more than Akbar, then Akbar gets
a) 10% less than Verma
b) 9% less than Verma
c) $9\frac{1}{11}$% less than Verma
d) 10% more than Verma

127. If the radius of the base of a cylinder is 2 cm and its height 7 cm, then its curved surface area is
a) 44 cm^2 b) 22 cm^2 c) 88 cm^2 d) 56 cm^2

128. The sides of a triangle are 3 cm, 4 cm and 5 cm. Its area is

a) 12 cm^2 b) 15 cm^2 c) 20 cm^2 d) 6 cm^2

129. The value of $1^2 + 2^2 + 3^2 + ... + n^2$ is
a) $\frac{n(n+1)}{2}$ b) $\frac{n(n+1)(2n+1)}{6}$
c) $\frac{n(n+1)(2n-1)}{6}$ d) $\left[\frac{n(n+1)}{2}\right]^2$

130. The number of lines of symmetry in a parallelogram is
a) One b) Zero c) Two d) Four

131. ABCD is a quadrilateral with unequal sides, unequal diagonals and unequal angles. E, F, G, H are the middle points of the four sides then EFGH is
a) Quadrilateral with unequal sides b) Parallelogram
c) Rhombus d) Rectangle

132. The value of -1 + $\cot^2$ A is
a) $\cos^2 A$ b) $sec^2 A$ c) $tan^2 A$ d) $co\sec^2 A$

133. The minimum value of $sec^2\alpha + \cos^2\alpha$ is
a) 1 b) 2 c) 0 d) -1

134. Find the value of $4\cos^2 A\, 60 + 4\tan^2 45 - \mathrm{cosec}^2 30$
a) 0 b) 2 c) 1 d) $\frac{1}{2}$

135. If the points (0 , 4) (4 , 0) and (5 , P) are collinear, the value of P is
a) -1 b) 7 c) 6 d) 4

136. The distance of the origin from the point of intersection of x + y = 11 and x – y – 3 = 0 is
a) 7 b) 14 c) $\sqrt{65}$ d) $\sqrt{33}$

137. The equation of the straight line which is perpendicular to 7x - 8y = 6 is
a) 8x + 7y = 3 b) 7x + 8y = 3 c) 8x – 7y = 3 d) 7x – 8y = 3

138. If the co-ordinates of the vertices of a triangle are (0 , 0), (0 , 2) and (3 , 1), find the area of the triangle
a) 3 sq. units b) -3 sq. units c) 2 sq. units d) 1 sq. unit

139. A student got marks in 5 subjects in a monthly test is given below.
2, 3, 4, 5, 6

In these obtained marks, 4 is the

a) Mean and median
b) Mean but no median
c) Median but no mean
d) Mode

140. If the standard deviation of 5, 7, 9 and 11 is 2, then coefficient of variance is

a) 15
b) 25
c) 17
d) 19

141. Which one of the following statements is correct ?

a) The standard deviation for a given distribution is the square of the variance
b) The standard deviation for a given distribution is the square root of the variance
c) The standard deviation for a given distribution is equal the variance
d) The standard deviation for a given distribution is half of the variance

142. For a given distribution, the arithmetic mean is 10 and the standard deviation is 8. The coefficient of dispersion is given as

a) 8
b) 80
c) .8
d) 1.25

143. Relation between mean, median and mode is

a) Mode = 3 Median - 2 Mean
b) Mean = 3 Median - 2 Mode
c) Median = 3 Mode - 2 Mean
d) 2 Mean = 3 Median + Mode

144. If the three points (1 , 4), (3 , y), (-3 , 16) are collinear, the value of y will be

a) 2
b) -2
c) 4
d) -4

145. Nineteen boys turn out for baseball. Of these 11 are wearing baseball shirts and 14 are wearing baseball pants. There are no boys without one or the other. The number of boys wearing full uniforms is

a) 3
b) 5
c) 6
d) 8

146. 3 men and 7 women can do a piece of work in 32 days. The number of days required by 7 men and 5 women to do a piece of work twice as large is

a) 19
b) 21
c) 27
d) 36

147. A train travelling with constant speed crosses a 96 metres long platform in 12 seconds and another 141 metres long platform in 15 seconds. The length of the train and its speed are

a) 84 metres and 54 km/hour
b) 64 metres and 54 km/hour
c) 64 metres and 44 km/hour
d) 84 metres and 60 km/hour

148. If 3^{4x-2} = 729, then the value of x is

a) 3
b) 1.2
c) 2
d) none of these

149. The sum of two numbers is 20; their product is 40. The sum of their reciprocals is

a) $\frac{1}{10}$ b) 4 c) 2 d) $\frac{1}{2}$

150. If $2x^2 + xy - 3y^2 + x + ay - 10 = (2x + 3y + b)(x - y - 2)$, the value of a and b are

a) 11 and 5 b) 1 and -5 c) -1 and -5 d) -11 and 5

151. When the distance between two charged particles is halved then the force between them becomes

a) One-fourth b) Half c) Double d) Four times

152. A pendulum is oscillating about its mean position in vacuum. It has

a) Only kinetic energy
b) Maximum kinetic energy at extreme position
c) Maximum potential energy at its mean position
d) Sum of kinetic energy and potential energy remains constant throughout the motion

153. Following is not a vector

a) Linear momentum b) Electrical Field
c) Kinetic Energy d) Acceleration

154. Light year is a unit of

a) Time b) Distance c) Velocity d) Acceleration

155. A wire of resistance 12 ohm is bent in the form of a circular ring. The effective resistance between the two points on any diameter of the circle is

a) 24 ohm b) 12 ohm c) 6 ohm d) 3 ohm

156. The temperature at which a gas must be cooled before it can be liquefied by pressure alone is called its

a) Critical temperature b) Saturation point
c) Boiling point d) Freezing point

157. Cooking is done fast in pressure cooker because

a) The boiling point of water is lowered
b) The boiling point of water is increased
c) More pressure is the cooker cooks the food at 100˚C
d) The boiling point remains the same but more steam cooks the food

158. Critical angle of light passing from glass to air is maximum for

a) Violet b) Blue c) Yellow d) Red

159. The instrument used to detect heat is
a) Weight thermometer
b) Thermo heater
c) Expansionometer
d) Pyrometer

160. When light passes from air into glass, it experience a change of
a) Speed only
b) Wavelength and speed
c) Frequency only
d) Frequency and speed

161. Max Plank is associated with
a) Quantum theory
b) Wave theory
c) The phenomenon of diffraction
d) The phenomenon of double refraction

162. Photo-electric cell is not used in
a) Television
b) Photography
c) Reproduction of sound in cinema
d) Automatic switching of street lightening circuits

163. Lenz's law is derived from the law of conservation of
a) Momentum
b) Energy
c) Charge
d) Magnetism

164. Transformers are used to
a) Convert AC to DC
b) Convert DC to AC
c) Step up DC voltage
d) Step up or step down AC voltage

165. A convex lens has a focal length of 10 cm. When it is immersed in water it will behave as
a) A convex lens of 10 cm focal length
b) A convex lens of 10 cm focal length
c) A convex lens of focal length greater than 10 cm
d) A convex lens of focal length less than 10 cm

166. In a *p*-type semi-conductor, the majority carriers are
a) Protons
b) Electrons
c) Holes
d) Positive ions

167. Challenger is the name of a
a) Space-lab
b) Space shuttle
c) Satellite
d) Rocket

168. In the visible spectrum the colour having the shortest wavelength is
a) Voilet
b) Blue
c) Red
d) Yellow

169. The transverse nature of light is shown by
a) Refraction of light
b) Reflection of light
c) Interference of light
d) Polarization of light

170. Sound is form of
a) Energy
b) Matter
c) Radiation
d) Electromagnetic energy

171. The instrument connected with the recording and reproduction of sound is called
a) Gramophone b) Headphone c) Hydrophone d) Ear phone
